

ABSTRACT

SUB
H8

This invention provides a thin meshy porous body which
is made of a metal, a resin, or paper, and which may be suita-
bly used as a core member for a battery electrode or various
5 filter members. Front and rear faces of a thin plate member
are embossed so that concave and convex portions of a conical
shape are opposite to each other, and an opening is formed in
a tip end of each of the convex portions in at least one face.
